

HIV Pharmacotherapy Fellowship

Mentor: Gene D. Morse, Pharm.D.

Location: Department of Pharmacy Practice
Laboratory for Antiviral Research
School of Pharmacy and Pharmaceutical Sciences
University at Buffalo, State University of New York

The fellowship program offers opportunities in Phase I/II clinical trials, population pharmacokinetics, pharmacokinetic/pharmacodynamic modeling, and therapeutic intervention trials focusing on adherence and therapeutic drug monitoring. The fellow has the opportunity to spend time in the Laboratory for Antiviral Research (LAR) and become skilled in drug assay procedures, data analysis, pharmacokinetic analysis, and statistical methods. The LAR is a designated Pharmacology Support Laboratory for the Adult AIDS Clinical Trials Group and a component of the UB Pharmacotherapy Research Center. The fellow will have opportunities to participate in concept and protocol development, as well as IRB submissions. The fellow also has the opportunity to prepare abstract of submission to peer reviewed scientific meetings, prepare manuscripts for publication and learn the grant application process.
